

Creating A Dichotomous Key

Create a dichotomous key for the following members of Kingdom Media based on their physical characteristics. As things like size and behavioral patterns can vary between organisms, it is better to use features you can see. For example saying the organism has fins is better than saying the organism lives in the water. Use the numbers given to identify each organism you have keyed out (for example, instead of writing Spiderman write # 4. You may create your choice of a branching or numerical key. Be sure to include a title.
